

IsoFLOP Experiment Comparison

$\Delta\% D^*$: per-budget % difference in optimal tokens ($D_{A3}^* - D_{A2}^*$)/ D_{A2}^*

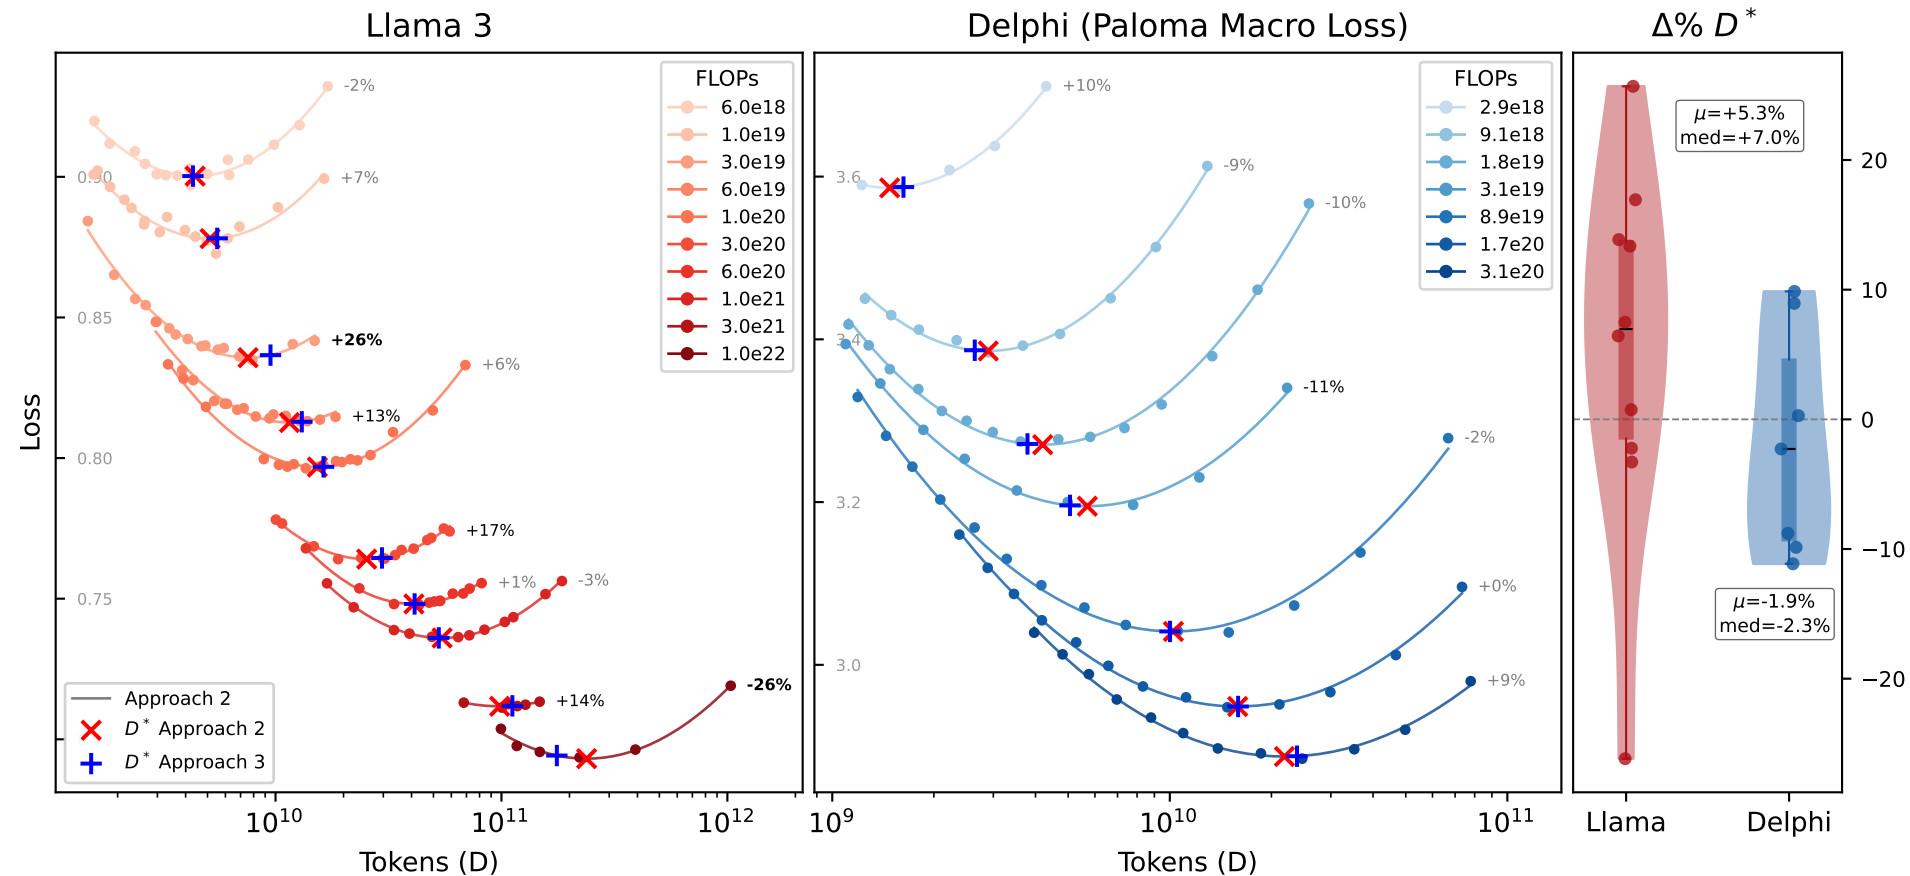

Figure 3: IsoFLOP curves with Approach 2 parabolic fits (L vs $\log D$) and inferred D^* vertices from Approach 2 (x) and Approach 3 (+).

Approach 3 fits $L = E + A/N^\alpha + B/D^\beta$ via VPMLS grid search. Violin plot shows distribution of per-budget $\Delta\% D^*$ between methods.
